

Omar Waheed AbdElbary.

Front-End Developer (Angular).

 omarabdelbary124@gmail.com  (+20) 01554535132  Cairo, Egypt.  25/08/2000

 Completed  Omar Waheed Abdelbary  Omar Waheed AbdElbary  myPotfolio

Education

Ras El Bar High Institute for Specific Studies And Computer Science

2019 – 2023

Bachelor of Management Information System.

Profile

Front-end Developer with strong expertise in Angular, building scalable and responsive web applications. Skilled in HTML, CSS, JavaScript, and modern Angular features to deliver clean, efficient, and user-friendly solutions. Passionate about creating seamless user experiences with high performance.

Professional Experience

AngularDeveloper, SEG Company

09/2025 – 11/2025

Mansoura, Egypt

Developed and maintained ERP and CRM systems using Angular 17, focusing on creating interactive, user-friendly, and high-performance interfaces. Implemented gamification features to boost user engagement, collaborated with backend teams for seamless API integration, and contributed to enhancing code quality, scalability, and localization support across multiple devices.

Skills

- Html & Html5.
- Bootstrap 4.6 & 5.3 .
- Problem Solving.
- Angular V17 & V9.
- Css & Css3.
- Git & GitHub.
- Type Script.
- Restful APIs Integration.
- Responsive Web Design.
- JavaScript.
- Oop.

Projects

ecommerce-app

• Built with **Angular 17 (Standalone Components + SSR)** for improved **SEO** and overall **performance**.

Authentication System: Register, Login, Forget Password (with email verification code).

Used **Auth Guards** to protect routes and manage user access based on authentication state.

Product Features: Home, All Products, Product Details, Categories, and Brands.

User Actions: Add / Remove products from Cart & Wishlist, edit quantity, write and delete reviews.

Payment Options: Cash on Delivery & Visa payment integration.

Profile Section: View user info, update password, and sign out.

Admin Dashboard: Manage products, categories, and orders (add, edit, delete, view details).

Implemented **Reactive Forms** with **FormBuilder** and custom **Regex validations**.

Applied **Interceptors** for global headers, centralized error handling, and loading management.

Used **Angular Signals (all types)** for **efficient state management**, reduced **change detection overhead**, and enhanced **app reactivity**.

Added **Lazy Loading** per module for better performance and SEO optimization.

project management system ↗

Angular 17 Developed a responsive user management system with three layouts (User, Admin, Auth). Users can register/login, update their profile and password, while admins can manage all users (view, edit, delete). Implemented role-based authentication, guards, interceptors, lazy loading, and SSR using Angular standalone components.

FreshCart ↗

Angular 17 with Server-Side Rendering (SSR) for better SEO & performance.

Authentication: Register, Login, Forget Password (with email code).

Auth Guards to protect routes and redirect users based on login state.

Product Pages: Home, product listings, details, categories, and brands.

Multi-language support: Arabic & English (with ngx-translate)

Interceptors for handling headers, global errors, and loading states

Add to Cart & Wishlist functionality.

Payment methods: Cash on delivery & Visa.

Used ngx-carousel, ngx-toastr, and ngx-loading for a smooth user experience.
